- Glossary creation
- Document translation
- Web localization
- Software localization
- Web and SW engineering services
- Technical and linguistic QA
- Desktop publishing
- End-to-end project management
- Interpretation

Your Localization Partner – iBIZNET

ENABL iBIZNET SUCESSFUL BUSINESS IN KOREAN MARKET

Korea is one of the leading countries in Information Technology business and its business has expanded rapidly. Though there are potential demands for multi-language services on Korean language, its localization skill is lower than any other Western countries and not higher than any other Asian countries. It is caused by critical problems such as misunderstanding Korean language, handling two bites characters, unqualified resources and dumping war.

Strong Access with Qualified Localization Services

Right from the start, your dedicated iBIZNET Project manager, along with a team of experts listens to your needs and comes up with the best solution to answer them. Your PM helps you optimize the use of your time by overseeing all activities during the project, providing you with status and pricing information, finding answers to all your questions and requirements, and making sure that our deliverables meet your expectations.

To solve above problems and achieve your goal in Korean market, we propose an alternative plan as follows;

Your Localization Partner – iBIZNET

Enabling Successful Business in Korean Market

OPTIMIZiBIZNET TOOLS

iBIZNET uses translation memory, automated translation, markup tools, terminology managers and quality control systems. These tools help significantly improve the cost-effectiveness and timeliness of your localized information: they optimize the use and reuse of translated content and ensure consistent quality across sites and languages.
