

Automotive and Mechanical Translations from English into French

There is probably only one translation agency in the world that translates only for the automotive and mechanical industry and only from English into French. That's us. For the past 35 years we have been subcontracting the translation of technical documents for most of the major manufacturers or makes of cars, trucks, buses, motorcycles, construction and agricultural machinery in the United States, Great Britain, Japan, Korea, Sweden, France or Germany such as General Motors, General Electric, Chrysler, Ford, Harley-Davidson, AGCO, CNH, Jaguar, London Taxis, Toyota, Honda, Suzuki, Mitsubishi, Isuzu, SsangYong, Subaru, Yamaha, Hyundai, Kia, Doosan, Volvo, Renault Trucks or Opel.

- We know perfectly well the needs and concerns of the manufacturers and their agencies. These are: meeting deadlines (urgent jobs within 24 hours), accuracy of figures, spelling and terminology, respect for customer glossaries, respect for budgets (each agency fix the price and Trados/Studio structure) without surcharges (less than 100 words: free), sufficient capacity to absorb any volume, use of preferred software for reusing existing memories, use of new neural translation if necessary without preconceived ideas but without excessive reliance, a true responsive agency service.

- Our team is made up of six European French-language translators who have been translating and proofreading or post-editing in French, on a full-time basis, for more than five years, documents of all kinds from automotive and mechanical manufacturers received in English and destined for France, Canada (respecting the rare Canadian specificities in the technical field), Belgium, Switzerland and Africa. Secretarial services are provided by a translator who is available at least from Monday to Friday from 9:00 a.m. to 12:00 p.m. and from 2:00 p.m. to 6:00 p.m. (Paris time).

- The automotive-translation company is legally constituted in Morocco in order to benefit from advantageous economic laws and to be able to offer competitive prices (our customers do not pay for our agency service), but it is managed by Europeans. We invoice at the end of the month and we accept payments within the agreed period by bank transfer to our TranferWise account.
