

Company profile

OLYSLAGER founded in 1948 is a mid-sized translation agency specialised in automotive translations into Dutch. Our unique selling point is that we employ experienced, automotive educated in-house translators. This enables us to deliver high volumes, in a high and consistent quality, during a short turn-around time. We are specialised in automotive translations but handle also related industry like transport, machine tools, industrial automation, robotics and agricultural machinery.

Our philosophy.

In order to create a quality translation, the (human) translator requires not only an excellent knowledge of both the source and target language, but also it is essential to understand the content, terminology and purpose of the source text. We believe this can only be achieved by specialisation, education and experience in, in our case, the automotive area of expertise.
