Work Experience

Period	November 2003 – present
Company	ANIA Consulting Engineers Shanghai
Branch	Consulting Engineers
	The company is an engineering agency with German and Chinese architects and engineers. It is specialized in providing professional architecture consultation to those German customers who are interested in investing and setting up factories in China, and at the same time the company co-operates widely with German architecture agencies and provides professional support on their activities in China
Job description	Associate to Project Manager I am responsible for supporting the communication between German project managers and Chinese engineers, the business negotiations and technical communications between German employers, German project managers and construction companies. I also do the translations of our company's technical documents from German to Chinese or reversely. I have rich interpretation and translation experiences in the field of architecture, and was the interpreter when the German Railway Affairs Delegation held speeches in China several times. I have also translated a lot of technical material, for example, translation of a full set of German Architecture and Railway Engineering profiled ballast mats(Unterschottermatten) material (German/English-Chinese).

Period January 2005 – present
