WORK EXPERIENCE

Tenebra Studios
Jan 2008 — Present

Tenebra Studios' CEO/ Lead Programmer/ Producer

Tenebra Studios is the name of the company i co-founded in Jan 2008. As a company we have successfully designed, produced and published two titles for iPhone(Magnetic Wars (a 2 player game) and Hellas Radio (a greek streaming radio application)). We are currently in the review process of the iPhone AppStore, for our third title called BlackJohn (a reflex action game). We specialize in AdverGames. We have already created and published an AdverGame for Abbott Laboratories Hellas for the pc platform and are in the process of creating three AdverGames for the greek Lipton Ice Tea, Axe and L'Oréal publicity campaigns. We are also making a multiplatform-episodic adventure AdverGame for Abbott Laboratories Hellas. We are in the process of transforming a novel published through Ars Nocturna, to a survival horror adventure. We have created and are still creating many websites for other agencies and clients. All these can be found on our official website.

Abbott Diabetes Care Hellas
Oct 2008 — November 2009

IT Specialist

Work at Abbott Diabetes Care Hellas (on a six month contract renewed once), on the departments of telephone customer support and marketing. In the marketing department, i was in charge of computerization and development of statistics studies through the usage of programming languages   . Design and creation of programs that serve / facilitate the internal operations of the department (programs for automated creation of monthly reports according to parameters given by the user, programs that check monthly warehouse supplies and notify on shortages and other projects governed by NDA). I was also responsible for gathering statistical data regarding customer satisfaction/sales and competitiveness/sales growth in strategic sectors. In the customer support department, as Quality assurance expert and FAQ analyst. I have also given lectures, regarding the usage and repair/reprogramming of Abbot Diabetes care products, for the employees of the comapny. If requested, a recommendation letter from Mr Kalogridis Derkos, general director of Abbott Diabetes Care Hellas, can be presented.

PC Master   Feb 2008 — Feb 2009

Journalist

Editor for the greek computer games' magazine, PC Master and journalist in missions abroad on behalf of the same magazine (coverage of gaming events in France - Norway)

Plaisio Computers   Jan 2008 — Mar 2008

Mystery Caller

Work in the 'Mystery' department of Plaisio Computers. Both as a mystery caller and a mystery customer. Design and creation of FAQs and specialized questionnaires, for testing the knowledge of employees and general customer satisfaction/after sales services.

PC Master GOLD   Aug 2007 — Feb 2009

Journalist

Editor for the magazine PC Master GOLD (Special columns devoted to Linux and programming/game design). Also journalist covering domestic gaming events and expos.

Pi-Systems   Jan 2006 — Nov 2006

Trainee Programmer

Trainee Programmer in the Research and Development department of the company Pi-Systems (http://www.pi.gr/). I worked on two projects: "Stereostatika" and "Domostatika". My duties involved, source code cleaning, commenting uncommented old code, or rewritting/renewing code that existed in the codebase since the inception of the company in 1989. If requested, a recommendation letter from the Project Manager of the R & D Division, Mr. Peter Bofakos, can be presented.

Abbott Diabetes Care Hellas   Jan 2005 — Present

Seminar Presenter

Collaboration with Abbott Diabetes Care Hellas, on their customer training program, to interface glucose meters with a computer (Diabass, Freestyle, Copilot). Organizer and presenter, of training courses/seminars in the aformentioned programs/products for their employees and customers.

COMPUTER USAGE/ PROGRAMMING KNOWLEDGE

Excellent handling of Microsoft Office (Word, Excel, PowerPoint), OpenOffice, Internet, Windows, Linux, MAC OSX. Excellent programming skills in JAVA, JavaScript, Visual Studio 2005, Matlab, Octave, GLBasic, Xcode, GameSalad, opensource technologies and programs, mobile game programming / development. Very good knowledge of game development. Excellent usage of Joomla and many web technologies. Excellent usage of UDK/Unity for mobile development. I have also created my own proprietary, multiplatform, game/graphic engines for usage on my company's projects. These engines range from simple 2d point and click engines to full 3d engines with Newtond Sdk for physics support and FMOD framework for 3d sound support. Demos of all the aformentioned projects can be found at demos.tenebrastudios.com
