| 2016            | Shaw Academy<br><b>Granted Diploma in Blogging and Content Marketing.</b>                     |

### **Skills profile**

#### **Translating**

- As a volunteer and content creator in Syrian Researchers Initiative (from 2014 – till now), I translated many articles from English into easy and proper Arabic in many fields, such as medicine, sexual education, and other fields, to deliver new and important scientific content to the Arabic audience.
- During my studies in Orthodontics at Tishreen University (from 2014 – till now), I translated many papers and many Orthodontic books chapters to Arabic to aid me in making lectures and seminars to present in front of my colleagues.
- I've worked with SEVT Ltd. (based in London, UK) in translating medical papers.

#### **Voiceover**

- I record articles published by Syrian Researchers Initiative so they can be broadcasted on the website.
- I made voiceovers in the materials produced by Multimedia Department in the Initiative.

#### **Leadership and management**

- In the Syrian Researches Initiative, I'm responsible for managing the voiceover artists department. Previously, this department was not working very well, but I've been asked to revive the department by inviting new candidates and evaluate their performance in order to accept good voices in the team. I monitor and evaluate the voiceover artists' work, make sure that new candidates are capable of providing good audible materials and coordinate the work between the voiceover artists and content creators in the initiative.

## **Team working**

- I'm an active member in all the organizations I'm in and contribute to teams' ideas and outcomes. I recognize it's important to work together and to try and encourage those who may not be as confident as others. I always look forward to enhance the cooperation between me and my colleagues in every aspects of my life, including Syrian Researchers team and Syrian Arab Red Crescent team, to achieve the best results ever.

## **Motivation and ambition**

- I'm able to perform well in high-pressure environments as I'm very competitive with a strong motivation to succeed. An example of this is the way I'm able to balance volunteering in Syrian Arab Red Crescent and my role in Syrian Researchers Initiative alongside with my study, and I can meet all assignment deadlines.

## **Content creating**

- As a content creator in the Syrian Researchers initiative, I wrote articles in the scientific sections of the initiative and scripts for many multimedia materials in many fields of science, such as medicine, psychology, education and others.

## **Volunteering**

- I'm a volunteer at Syrian Arab Red Crescent. I think humanity is the only way for this world to end all of its tragedies, and giving without any price is a great human behavior. I help in Syrian Arab Red Crescent in providing food and other essential supplies for the refugees coming from cities around us, fleeing from conflict areas and seeking for shelter and safety.

## **Hobbies**

- Reading, especially novels and scientific books.
- Studying and learning new languages, such as German and French.
- Learning new things, such as music playing and programming and designing.
