SUMMARY

I am a south Brazilian student of Languages (graduating in Portuguese and Italian) who has been working as a translator for about a year. Although I am new to the market, I have already carried out two long projects – including a book, which is now being reviewed. These experiences allowed me to invest a bit in qualification courses as the ones here mentioned (and a few more to come). As I am seeing the first results of my efforts, I feel eager to translate!
