Description of the company:

FORTLAX helps information-dependant mid-size enterprises and organisations of all types to ensure the continuity of their business. FORTLAX' portfolio of services includes secure and

monitored on line backup; digital bankfack®, persistent and reliable long-term storage (e-archive), disaster and recovery planning etc.

FORTLAX hosts its services in one of the most secure and sophisticated data centers in Scandinavia. The facility is fully redundant in terms of power, cooling and internet access and a location close to the polar circle reduces the energy required for cooling. In addition to meeting the highest standards in physical and perimeter protection it is also shielded against Compromising Emanations (CE, Swedish: Rös) as well as Electro Magnetic Pulse (EMP). The facility is designed to withstand physical attacks (gas, firing etc) as well as enduring total isolation from the outside world for an extended period of time.

Group Manager at Luleå University of Technology

June 2016 - May 2017 (1 year)

Group Manager at the University Library, at the department for Information resources, publishing and systems. Planning, managing and monitoring the work at the department.

Project manager - implementing the university's new publication database.

Librarian - team manager in the area of research- and publishing support at Luleå University of Technology

April 2015 - June 2016 (1 year 3 months)

Planning, implementation and monitoring of library service offerings as addressed to researchers and management. Planning, implementation and monitoring of publishing management.

As function manager I am a member of the library management. I am responsible for planning, implementing and monitoring operations and resources in this area. I also visualize what skills are required in the area. I am taking the responsibility for the area being in accordance with the processes at the university. It is my responsibility that the area is communicated internally and externally according to agreed procedures. I am responsible for necessary procedures and instructions and their implementation in the area.

Librarian with focus on digital services at Luleå University of Technology

October 2013 - March 2015 (1 year 6 months)

As a librarian with a focus on digital services, I work closely with the system and operations specialists when it comes to the integration and management of digital services and systems. I am a link between the library which stipulates requirements and IT Service as a provider of systems. Within the library's digital team, I work with user support of library systems. My mission is also working visionary, development oriented and environment-watching with the technical

infrastructure for research libraries and I have the task of linking the library's business development with user needs and technological conditions.
