## RELEVANT SKILLS

**I am well read in and have personal interest in the following fields:**

Arts and Crafts, Art History, Literature, Psychology, Fashion, Video and Board Games, Plant Care and Animal Welfare, General Science, Linguistics, History (Bulgarian, British and Japanese especially), Contemporary Politics, Human Rights

As part of my education in the Japanese Studies bachelor's degree programme I developed organisational and managerial skills by taking part in different cultural, educational and fundraiser events. I've had the responsibility of overseeing the execution of such events from start to finish by being in charge of allocating tasks and seeing to their proper execution, being in contact with sponsors and managing finances for necessary expenses, ordering, organizing and keeping stock of materials, as well as personally and as part of a team crafting and creating materials.

My education in the programme also had a heavy and continuous focus on studying various general translation and teaching methods, as well as translation with the following language pairs: Japanese <> Bulgarian, Japanese <> English.

Since high school I have taken part in many artistic competitions and exhibitions as an illustrator and writer of poetry and short prose in Bulgarian, English and German. My works have been published in official art and literature books and magazines in my home country of Bulgaria.
