Focus on the implementation of technology in other fields, including Education, Nonprofits, and Health.

Diverse breadth of electives, including Philosophy, Psychology, Business, Commerce, Economics, Music, and Theatre.

Skills & Experience

Education

- Develop and deliver lesson plans for a variety of ages (8–80) and abilities (starter–advanced) in diverse environments, including classrooms (2–30+ students), private lessons, lecture series, workshops, discussion groups, and via online platforms.
- Provide feedback as part of a practical cumulative learning process and evaluate students' proficiency through conventional (essays, exams, presentations) and non-traditional (role-play, story-/game-based) assessments.
- Bring a practical and dynamic approach to learning, developed through engaged research and firsthand experience in the classroom, implementing the best small teaching practices.
- Continual pursuit of knowledge and personal self-development.

Technology

- Deploy and administer online platforms for organizations, with an emphasis on education, utilizing a variety of content management systems.
- Implement online/cloud tools, often with a focus on media (podcasting, live and on-demand video streaming, etc.).
- Edit video and audio, with a focus on story-based compositions.
- Collect web analytics and create data visualizations.

Language

- Translate, proofread, and edit academic work, including journal abstracts, articles, proposals, research methods, and theses in a variety of fields including Mathematics, Engineering, Ergonomics, Psychology,, and Veterinary Science (Portuguese to English).
- Translate, proofread, and edit personal and professional documents, including résumés, letters of intent/invitation, etc., and prose writing.
- Produce analytical reports and research.
- Copy-write, layout, and design for customer-facing resources (web, posters, signage, etc.).
- Love language in its many forms, with an appreciation for a well-crafted phrase, from Shakespeare to Lispector.

Practical

- Organize and conduct cooperative youth projects, in partnership with local government and community groups.
- Attend international education conferences to participate in conversations and workshops regarding current best practices in high school classroom teaching.
- Help individuals prepare for international study and work exchange experiences, including developing interview skills and development of resumes and cover letters
