My solid and diverse research background, along with my passion for executing actions makes an ideal lab researcher that company is looking for.

With having many diverse backgrounds about research, I am highly experienced with test protocols and equipment Calibration. Additional skills like coding for R or knowing how to do video editing can also make me a perfect ideal candidate. I am adept at working with efficiency and accuracy from getting helps from co-workers. And I know how to do multi-task efficiently with accuracy. I would very much like to discuss opportunities.

I would like to discuss further about working. Feel free to contact me via email or phone calls.

Thank you for taking the time to review my resume. I look forward to talking with you.

Sincerely,

Han Noh
