SUMMARY

I am considered a versatile translator, with a wide well-educated cultural range of interests and proficient verbal/written skills. Trained and experienced in creative and SEO writing, I feel confident enough to translate about numerous fields, namely board games, video games, aeronautics, IT and sports. As a lifetime IT advanced user, I have a gift for CAT tools and any other useful side software supporting the translation process. On the other hand, I feel it is mandatory to meet the most demanding quality standards and Industry's best practices. That's why I keep a clockwork-precision organization of my working schedule, always meet the deadlines and conditions agreed and maintain a clear, close, friendly, and well-mannered communication with both colleagues and clients. I am fully and legally enabled to issue invoices worldwide.

WORK EXPERIENCE AS A FREELANCE TRANSLATOR
