Servers	Tomcat, Jboss, XAMP, WAMP, Liferay
OS	Cent OS (minimal, GUI), Ubuntu, Windows
Team management	GIT, TFS, Bit bucket, Jira, confluence
Miscellaneous	Hibernate, Spring boot, Jmeter, Karma, Networking, ireport, piwik, Google APIs, JavaFx, Maven, Payment Gateways, Spring Data, UML, OpenCV, DevOps, Docker, Jenkins, Quartz jobs, Spring Security, Mean Stack

I have specialized Service oriented architecture. Most of the things I do, I do it in SOA way.

A picture is worth a thousand words. isn't it?

Projects (picked 4 out of nearly 20)

- **Job Board (Intelligent Job Search Engine)**

  Played Tech lead role.

  Job board facilitate post jobs, search jobs, find employees and suggest jobs for users. It has an artificial intelligence system to match registered users with relevant vacancies. Unless like other job search engines it provides most relevant candidates for employers and most relevant jobs for candidates.

  Used technologies – Java, Spring MVC, Neo4j, javascript, jQuery, html, CSS, bootstrap, JasperReport, Spark

- **Management System for Sri Lankan District Secretariats**

  Played Tech lead role.

  The system is a generic web application for almost all Sri Lankan District secretarial offices. They have large number of excel sheets to maintain. The system is not a complex system but its bulky. Lots of inputs and hundreds of reports. And customizable across different secretariat offices is a nice feature.

  Used technologies – Java, Spring Boot, MongoDB, JasperReports, AngualrJs, javascript, html, CSS, bootstrap

Customer Support Helpdesk System for Ewis (EW Information Systems)

Played the Tech lead and project manager role.

Handling all customers' complaints, inventories, generating notifications and rating employers are the major parts of the system. Other than that, there is a mobile application which has been installed on field employees that they can communicate and get notifications from main server. This system is currently handling all the engineering system at the company.

Used technologies – Java, Rest web services, Angularjs, javascripts, Oracle, IONIC, html, CSS, bootstrap.

ERA-Insight (At Virtusa)

ERA is An Enterprise level code governing tool. It can detect build failures, best practices violations, possible runtime failures and other code issues developers does when coding. It provides suggestions to fix them with the location of the code. There is a notification system running on to notify developers when they have committed a violation of code. Apart from that a game is running on rating developers based on their performances. Those results displayed using a web application that help managers to make decisions on different sections of project managing.

Used technologies –

Java, Spring, ibatis, mssql, REST web services, java scripts, jQuery, ajax, CSS, html

(For version 4)

AngularJs, java scripts, Java, REST web services, orientDB, jquery, css, Html

(For version 5)

Extra Curriculum Activities

- As a student I have engaged in sports activities and have certificates from Javelin, put shot, Discus throw, Karate, Cricket, Elle, volley ball and from many others.

- I have all island certificates as a writer (Short story, Novel, Free verse). Also, I have published few books.

- Active member of school time as a leader and have many certificates from school competitions.

Special Skills

Team work

I enhance my think ability as team player, and my performance is really well done. I am good problem solver as team player and I would like to share my experience with my team.

Working under pressure

For my whole career, it is the one of constants, the pressure. I learnt how to deal with pressure while delivering.

Time management

Tight deadlines with my undergraduate studying means that I have had to manage my time to make sure that I get all my work done. In the Present, I had to balance with my Studies & my job responsibilities which taught me to priorities.

Quick learner
