

SILKY SANTOSH

Software Tester

Staffanstorp, Sweden

Phone: +46-734982230 | Email: silkysantosh01@gmail.com | ([LinkedIn](#) | [GitHub](#))

Profile Summary:

Silky is a Software professional with over 4 years of experience as a Software QA, writing and executing manual tests and developing automation test scripts using Selenium-Python. She has also worked as a Software Frontend developer for around a year using HTML, CSS, JavaScript, React, Bootstrap-5, and GIT to provide good support to the company's IT team in developing and deploying web-based event and registration software tools. She has experience in Web based application testing in Agile and Scrum product delivery environments.

Behavioral skills:

- Friendly
- Willingness to learn
- Teamwork
- Problem-solving
- Creativity
- Time management

Technical Skills:

Manual Testing	(Functional, Exploratory, Localization, Sanity, Smoke, Compatibility, Regression, Retesting, UI Test, and Beta Test). Writing and Execution of Test Case
Automation Test Tools	Selenium, Cypress, Cucumber
Programming languages	HTML, CSS, JS, Python
Tools	JIRA, POSTMAN, Test-Rail, Test Link, Jenkins, Charles Proxy web debugging tool, Xmind, Figma
IDE	PyCharm, VS code, Codepen, Katalon Studio, Atom

Experience Summary:

Software Tester (Freelance) Open platform, Sweden (Remote). Sep 2016 – Present

Roles and Responsibilities:

I have worked as a Software tester for several clients like HBO max, Disney+, Discovery, Trustly, Klarna, Garmin, Tidal, Candy crush... etc.

Task includes:

- Requirement Analysis to raise high-quality bugs.
- Well versed in performing Functional, Exploratory, Localization, Sanity, Smoke, Compatibility, Regression, Retesting, UI Test, and Beta Test
- Writing and executing test cases.
- Finding defects and reporting to the TTL using the Jira tool.
- Preparing test reports using XLS
- Automation testing (Selenium-python)
- Implementing Page object model and generating HTML reports using Html test runner.
- Performing Functional, Non-Functional Testing including Automation using Selenium for Web-based and Appium for Android and iOS.
- Framework implementation using POM strategies.

Software Frontend Developer Trainee

STORVIX AB, Lund Sweden.

Storvix is a cloud-based company that works with the vision to provide an IT storage layer to better understand data usage and protection.

Roles and Responsibilities:

- Involved in the implementation of new features like Buttons, Dark-light mode of the page, Dropdowns, Alignments, etc.
- Used CSS framework: Bootstrap-5 and Google material design for implementing the features.
- Involved in finding and fixing defects.
- Used Trello to update my daily task.
- Involved in Scrum and Agile methodologies.

Inhouse Projects:

1. Project Description: Test Automation using CYPRESS - Agile Travel (Flight booking workflow)

Created a Test automation project using Page Object Model in Cypress.

I have used an Agile Travel dummy project for automation.

The project consists of 4 pages and features like Login, Flight selection, Passenger details, Transaction details, and Logoff.

Tools and methodology: I used VS code to develop the test code and Jenkins, and Cucumber for integration.

2. Project Description: Test Automation using SELENIUM-PYTHON: Agile Travel (Flight booking workflow)

Created a Test automation project using Page Object Model in Selenium-Python.

I have used an Agile Travel dummy project for automation.

The project consists of 4 pages and features like Login, Flight selection, Passenger details, Transaction details, and Logoff.

Tools and methodology: I used Pycharm IDE to develop the test code and generate an HTML report using an HTML test runner.
