## TECHNICAL SKILLS

Confident:

HTML5

CSS 3 & SCSS

JavaScript

jQuery

Bootstrap

SASS

Responsive CSS

Page Builders

CMS

Git

M365

No-Code/Low-Code Development

Cross Browser Testing

Unit Testing

Website Testing

QA Testing

Zoom

Digital copy editing and development editing

Proofreading

Graphic design

Audio and video production - filming, editing

Voiceover Artist

Comfortable:

Photoshop

Adobe

Figma

Played with:

Bulma

## PROFILE

I was pursuing a path in Digital Marketing when I first came across programming. Digital Marketing included designing content and producing graphic designs. Some aspects of Digital Marketing also required creating HTML pages and using basic CSS. This opened my eyes to the massive capabilities of programming and the possibilities it can create in advancing the future.

My cousins who work as developers at Sky & BBC encouraged me to take on a crash course with General Assembly as they did and since then I haven't looked back.

I find the challenging and sometimes brain wracking yet rewarding nature of web development incredibly exciting. I love taking on the challenge and I am motivated by the relief when I've fixed a bug in the code.

I am now looking forward to be part of a company that offers a challenging opportunity in a creative learning environment where I can build upon my skills.

## EXPERIENCE

### Absolute Interpreting and Translations Ltd

14 November 2022 | Present

I have worked as a freelance voiceover artist on a range of projects including recording voiceovers for translated documents for an extensive project. As a multilingual, I also proofread translated documents.

### Achieve UK Training Ltd

26 July 2021 | 17 November 2021 | Birmingham/remote

I worked as a front end developer with an education provider start-up.

The tech stack included HTML, CSS, JavaScript and Photoshop.

I also designed landing page for a construction company partnered with Achieve UK Training Ltd.

### West Midland Combined Authority

16 September 2019 | 13 March 2020 | Birmingham

I worked as a Front End Developer for the Design Team at WMCA.

My role involved HTML, CSS, SCSS, JavaScript, WordPress, Zeplin, M365 and bitbucket (source tree) for code deployment.

My day-to-day duties included creating new pages for the company website, editing and updating existing code, mobile responsiveness.

## Jump24

19 June 2019 | 17 July 2019 | Birmingham

My role as a junior front end developer with Jump24 entailed working with HTML5, CSS, JavaScript, Sass, on various projects.

Using Sublime and Visual Studio Code, I created new responsive pages for the company website adhering to the UI design and performed cross browser and unit testing to ensure correct display of the websites on all search engines and devices.

Some projects I worked on:

Culture Mile:

<http://explorers.culturemile.london/>

Jump24 Website:

<https://www.jump24.co.uk/>

## Halfords

18 April 2019 | 17 May 2019 | Redditch

I was given the opportunity to work as a Junior Front End Developer for the Digital Content Team at Halfords, involving HTML, CSS and JavaScript.

My role included updating landing pages, mobile website, product description pages, up-sell messages and key information on products. Moreover, I carried out promotional launches and improved web speed optimisation by refactoring the code.

---

## Relevant Education

### Web Development Immersive, General Assembly

Apr - Jul 2018 | London

I completed my web development immersive course with General Assembly. Mornings at GA were always interactive following up with daily stand ups which involved challenges faced by each individual during projects or homework. This Web development immersive course was set in Agile environment followed by the interactive lessons throughout the course to overcome any issues and kept up-to-date with the latest technologies and current demand in market. The course is quite challenging and fast-paced as I had to build all projects in one week time-frame which developed my personality in ways I did not imagine. I am now ready more than ever to accept whatever challenges come in my way.

Birmingham Metropolitan College, Birmingham  
Access Course to HE in Business  
Level 3 Pass  
12th Sep 2016 - 30th July 2017

GCSE  
English Language: B  
Computer Science: B  
Mathematics: B  
Physics: B  
Chemistry: C  
History: B  
Religious Studies: A  
Foreign Language: A  
Sep 2013 - June 2015

## INTERESTS

I have had a wild interest in art from a young age. I utilise my spare my time brainstorming ideas to implement through art including paintings, sketching and making dough jewellery.

My sport hobbies include frisbee, baseball and badminton.

On other days, I love cosy corners with a book in my hand and a well made hot chocolate!

## PROJECTS

### Project 1: Follow Me

HTML, CSS, JavaScript, Git

For the first project where condition was to create a JavaScript based game, I chose to create something simple yet achievable; a memory game. The user has to remember and click cards in the order they were flashed to gain points and win. The app uses mathematical complexities to calculate user's response against that of the computer and decide when and whom to allocate points.

<https://ssaba96.github.io/First-WDI-Game-Project/>

<https://github.com/ssaba96/First-WDI-Game-Project>

### Project 2: Horoscopes

HTML, SCSS, Git

The app lists out zodiac signs for users to select and on entering their date of birth, they are given a prediction for the day. MongoDB is used to store predictions which are retrieved with a calculation against the current weekday/date and a certain zodiac sign.

I am currently resolving some errors in the application which have occurred after adding some new features.

<https://github.com/ssaba96/WDI-P2-funny-predictions>

### Project 3: Museums

HTML, SCSS, JavaScript, Git, FilePicker

The users can view the different categories of museums, their location and leave reviews. The app makes use File-picker for creating user avatars.

<https://limitless-meadow-42084.herokuapp.com/#/>

<https://github.com/ssaba96/WDI-PROJECT-3>

### Project 4: Wicked Talent

HTML, SCSS, JavaScript

The users will be able to display their individual talents by marketing them through this job board and will be able to get hired by clients.
