Experiences

Skyscanner

-Designer & Translator

I've worked for them and designed their website interface around 7 times. But I specialize in Logo & Business card design. My working experience with them was favorable and helped to enrich my content quality. I was their professional translator and worked in the South Asian region. I've translated 8000+ messages on their website from English to Bangla and Bangla to English.

Twilio

-Voice artist & Interpreter

I've given my voiceover in Twilio's contents 1000+ times. Twilio is a cloud communication company. As I can speak Native Bengali, Hindi, and Urdu, I worked as an interpreter for them. Translating from these languages to English after listening is not a deal for me.

Education

BRAC University, Dhaka, Bangladesh

- BSc in Computer Science & Engineering

Expected passing year - 2025
