Copper T 380 A / 200 B

Eve's

EVE'S Copper T

Offers wider choice of contraception in the form of two most popular and widely used models of Intrauterine Devices worldwide.

Reversibility of these IUD's provides the freedom of planning a child any time. Just by requesting the removal of this device the user is free to expand her family.

The quality, safety and effectiveness have been designed and built into our product with Hi-Tech manufacturing facilities, under meticulous adherence to current Good Manufacturing Practices (cGMP).
